1. Population Size and Principal Demographic Structure

Population Size

Total population of Macao was 552,503 on 12 August 2011, an increase of 117,268 (+26.9%) in comparison with 2001, with an average annual growth of 2.4% over the past 10 years. (Table 1)

Rapid economic development induced growing demand for human resources; however, non-resident workers were conducive to ease manpower needs yet speeding up population growth as well. When the 2011 Population Census was taken, there were 62,304 non-resident workers and 4,944 foreign students in Macao that took up 12.2% of the total population. Excluding non-resident workers and foreign students, the local population totalled 485,255. (Table 33)

Chart 1 – Population change

Age and Gender Structure

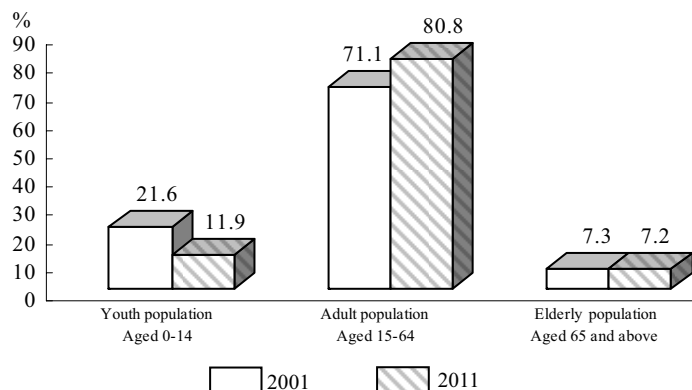

Analysed by age structure, number of newborns declined continuously after peaked in the mid-1980's until a gradual rebound in 2003; consequently, the youth population (aged 0-14) decreased substantially by 30.1% from 2001 to 65,870 (11.9% of the total population), down by 9.7 percentage points over the past ten years.

The elderly (aged 65 and above) totalled 39,964 that made up 7.2% of the total population, down slightly by 0.1 percentage point from 2001. In fact, number of elderly increased by 8,276 (+26.1%) over the last decade; the increment is similar to that of the total population. As the majority of incoming immigrants and non-resident workers were adults, who helped slowing down the pace of population ageing.

For those who were born in the baby-boom of the 1980's now become part of the adult population (aged 15-64) and most incoming immigrants and non-resident workers fall in this age group; as a result, number of adult surged by 44.4% from the past decade to 446,669, accounting for

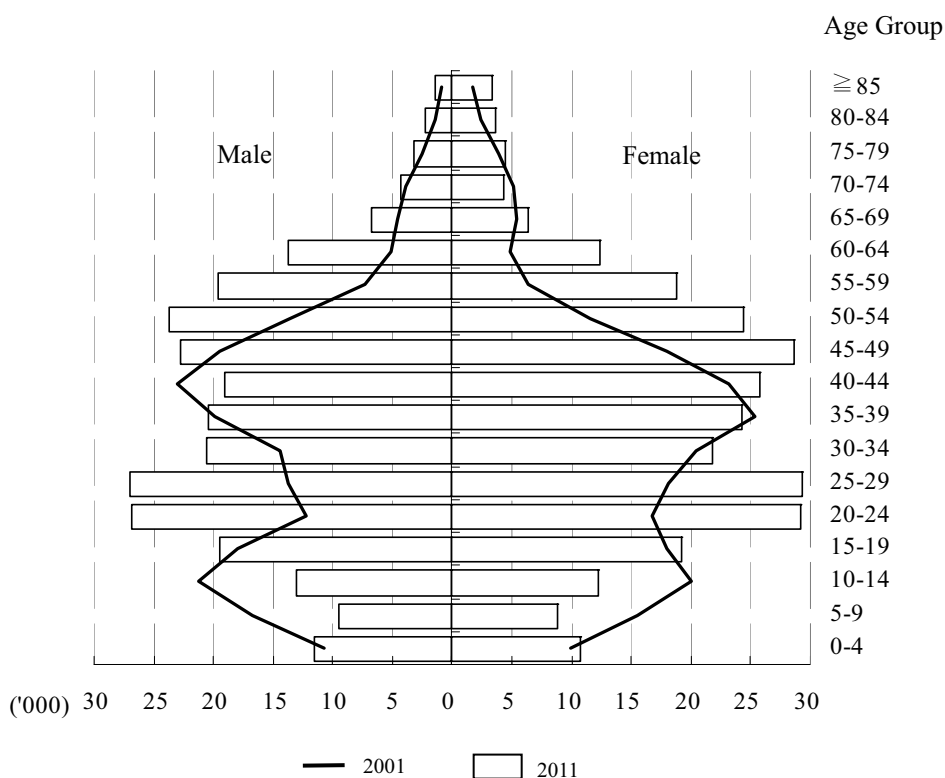

80.8% of the total population, an increase of 9.7 percentage points.

Chart 2 – Distribution of population by age group

Low fertility rate and longer life expectancy contributed to the continuous ageing of the population; median age stood at 37.0, an increase of 3.7 years over the past decade. Population pyramid of Chart 3 showed that in comparison with 2001, the pyramid base narrowed further attributable to the decline in number of newborns; however, the upper part representing those aged 45 and above was broader, with those aged 45-64 accounting for 29.6% of the total population, up by 9.8 percentage points from ten years earlier.

Chart 3 – Population pyramid (2001 and 2011)

The increase in adult population and the decrease in youth population caused the overall dependency ratio to decline significantly to 23.7% in 2011, in comparison with 40.7% in 2001.

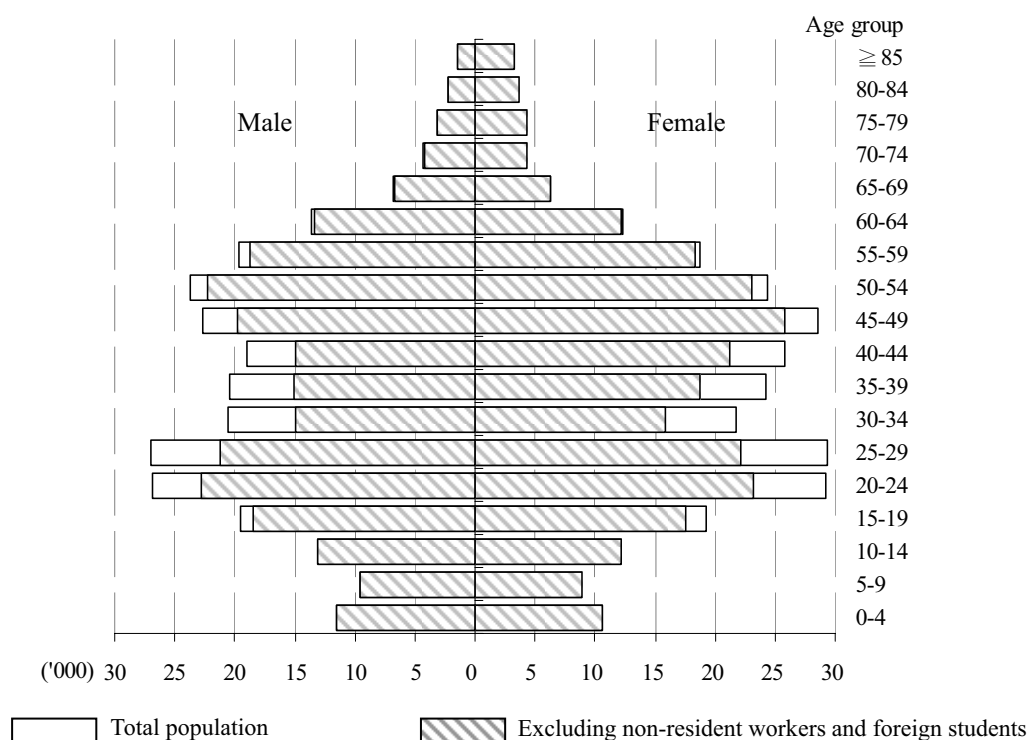

1 – Dependency ratio

Dependency ratio	%		
	2001	2011	
		Total	Excluding non-resident workers & foreign students
Overall dependency ratio	40.7	23.7	27.8
Youth dependency ratio	30.5	14.7	17.3
Elderly dependency ratio	10.2	8.9	10.5
Ageing ratio	33.6	60.7	60.3

Chart 4 showed that non-resident workers and foreign students predominated in the six age groups between 20-49. Excluding non-resident workers and foreign students, median age of the population increased to 38.1, up by 1.1 years from 37.0 and the dependency ratios also increased, denoting that non-resident workers and foreign students helped to decelerate the pace of population ageing.

Population aged 55-64, the age group with fewer non-resident workers, totalled 64,383 or 11.7% of the total population, who will become part of the elderly population in the next ten years; therefore, the pace of population ageing is expected to accelerate.

Chart 4 – 2011 Population pyramid

Mean age of the population was 37.5. Analysed by statistical area, higher mean age was being observed in those living in Baixa de Macau, Praia Grande & Penha, Conselheiro Ferreira de Almeida, Coloane Island, Horta e Costa & Ouvidor Arriaga, and Guia. These used to be the early developed residential districts that were characterized with a sizable share of elderly (over 10% of the total) and small number of youth; as a result, the ageing ratio was far higher than the total of Macao. Besides,

Coloane Island had an ageing ratio of 134.1% that was attributable to the fact that the proportion of youth shared merely 8.2% of the total and the establishment of several elderly homes in that area.

2 – Statistical areas with higher mean age

Statistical area	Total	Mean age	Age structure (%)			Ageing ratio (%)
			0-14	15-64	≥65	
Total	552,503	37.5	11.9	80.8	7.2	60.7
Baixa de Macau	21,423	41.4	9.6	78.0	12.4	128.8
Praia Grande & Penha	11,085	41.2	11.1	76.6	12.3	111.0
Conselheiro Ferreira de Almeida	26,253	40.7	10.7	78.4	10.8	100.6
Coloane Island	4,262	40.3	8.2	80.8	11.0	134.1
Horta e Costa & Ouvidor Arriaga	24,409	40.0	11.6	77.7	10.7	92.5
Guia	5,516	40.0	13.1	76.1	10.8	81.8

Regarding the gender structure, male (265,144) and female (287,359) accounted for 48.0% and 52.0% of the total population respectively, similar to that in 2001. With female outnumbered male, the gender ratio stood at 92.3 males per 100 females.

3 – Gender structure

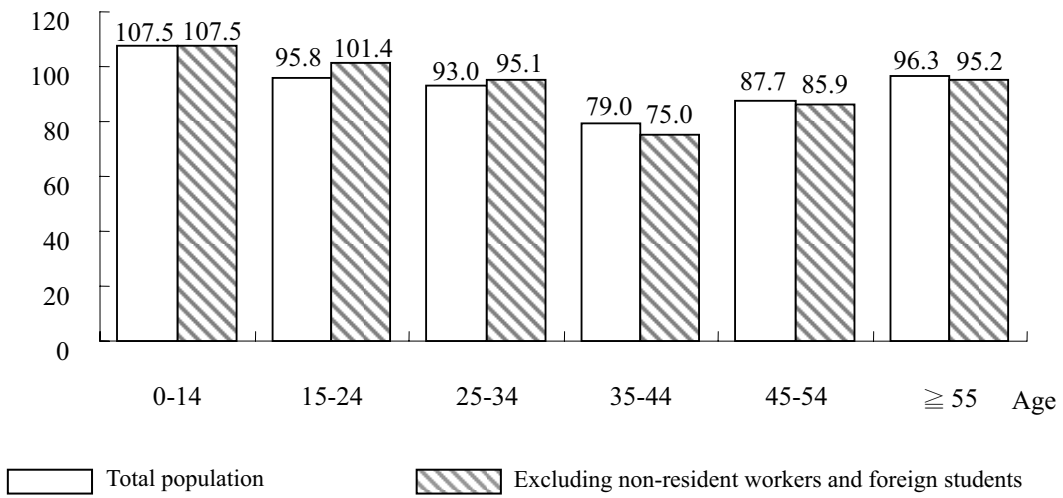

Gender	2001		2011			
	Total	Structure (%)	Total	Structure (%)	Excluding non-resident workers & foreign students	Structure (%)
Total	435,235	100.0	552,503	100.0	485,255	100.0
Male	208,865	48.0	265,144	48.0	233,483	48.1
Female	226,370	52.0	287,359	52.0	251,772	51.9
Gender ratio	92.3		92.3		92.7	

In respect of gender ratio by age group, as male babies outnumbered females, gender ratio of the youth was 107.5 males per 100 females. For the adult and elderly, the majority of those moving to Macao were female and female tended to have longer life expectancy; therefore, gender ratio of the adult was 91.2 males per 100 females and that of the elderly at 81.4 males per 100 females respectively.

Excluding non-resident workers and foreign students, gender ratio went up from 92.3 per 100 females to 92.7 males per 100 females. As shown in Chart 5, gender ratio of those aged 15-24 saw apparent increase, as well as improvement in those aged 25-34, revealing that female outnumbered male in the two age groups was attributable to the non-resident workers and foreign students. On the contrary, for those aged 35 and above, gender ratio declined further after excluding non-resident workers and foreign students, indicating that female outnumbered male more obviously in these age groups. (Table 33)

Chart 5 – Gender ratio by age group

No. of males per 100 females

2. Other Demographic characteristics

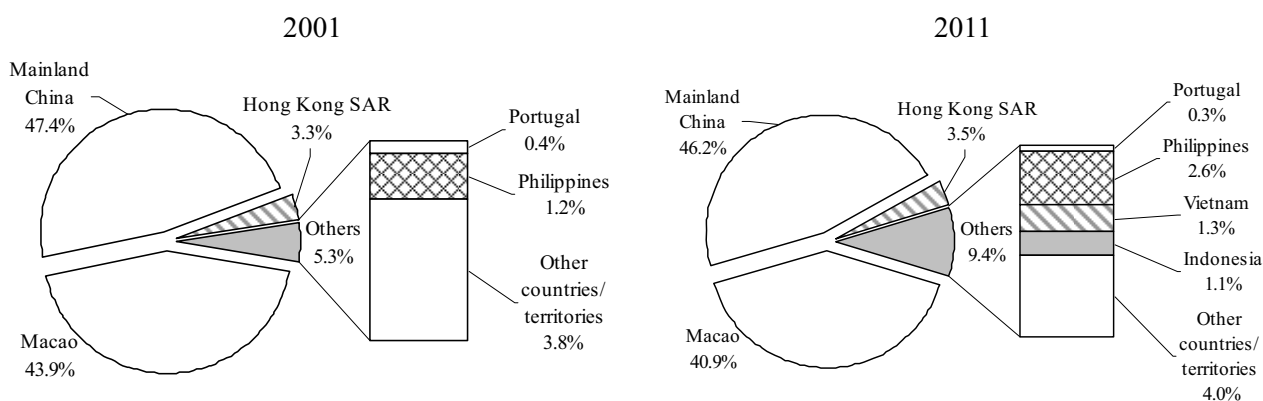

Place of Birth

Incoming migrant is an essential component of the population. Results of the 2011 Population Census indicated that 326,376 (59.1% of the total population) were born outside Macao, an increase of 3.0 percentage points over the last ten years. Analysed by place of birth, 255,186 (46.2%) were born in Mainland China, down by 1.2 percentage points from 2001. Besides, 226,127 (40.9%) were born in Macao, 19,355 (3.5%) in Hong Kong Special Administrative Region and 1,835 (0.3%) in Portugal. (Table 5)

There were more persons born in other countries or territories as the number of non-resident workers increased. Among them, 14,544 were born in the Philippines, 7,199 in Vietnam and 6,269 in Indonesia, altogether taking up 5.1% of the total population. Besides, 1,942 were born in Europe other than Portugal, 2,252 in Americas, 959 in Africa and 672 in Oceania.

Analysed by age group, 85.2% of the youth population (aged 0-14) were born in Macao, and 62.9% of those aged 35 and above were born in Mainland China.

Chart 6 – Distribution of population by place of birth

Nationality and Ethnicity

Analysed by nationality, 509,788 (92.3% of the total population) were of Chinese nationality, down by 2.9 percentage points from the 2001 Census; meanwhile, only 0.9% was of Portuguese nationality, a decrease of 1.1 percentage points. Over the last ten years, diversity of the various components of the population is enhanced as economic development has drawn people to invest, work or study in Macao; consequently, 37,695 (6.8%) were of other nationalities, up by 4.0 percentage points, with 2.7% being Filipinos. (Table 6)

Macao is a Chinese community and those of Chinese ethnicity totalled 510,383, an increase of 94,030 over the past ten years; however, its proportion to the total population decreased by 3.3 percentage points to 92.4%. Those of Portuguese ethnicity totalled 8,106, up slightly by 333 compared with 2001; its proportion to the total decreased by 0.3 percentage point to 1.5%. (Table 7)

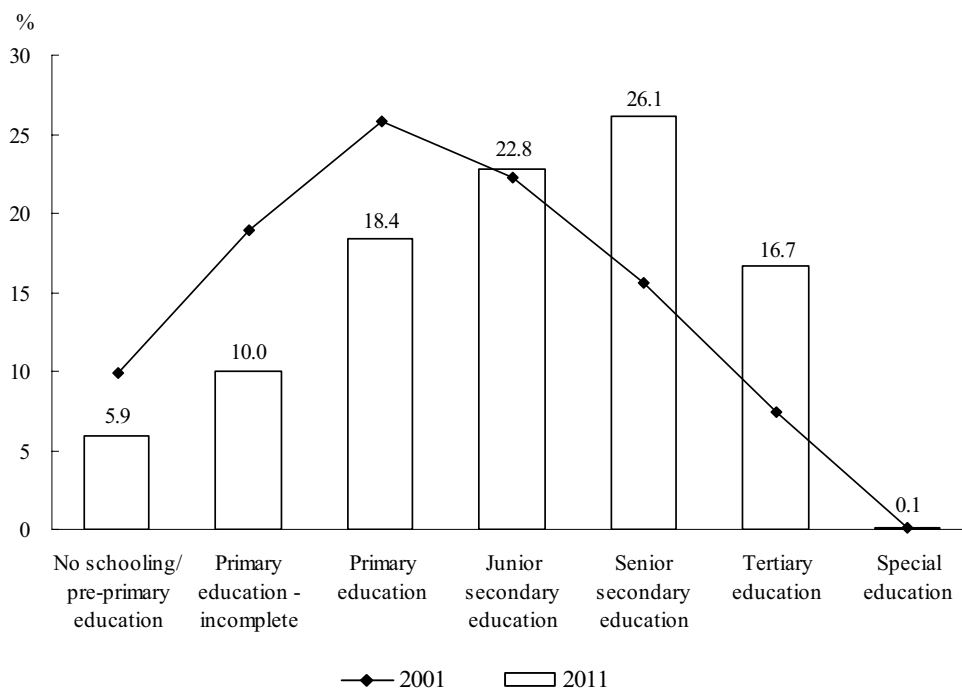

4 – Distribution of population by ethnicity

Ethnicity	2001		2011	
	Total	% Share	Total	% Share
Total	435,235	100.0	552,503	100.0
Chinese	416,353	95.7	510,383	92.4
Chinese & Portuguese	4,254	1.0	4,019	0.7
Portuguese	2,810	0.6	3,485	0.6
Chinese & non-Portuguese	1,771	0.4	1,601	0.3
Others	10,047	2.3	33,015	6.0
Portuguese & others	709	0.2	602	0.1

Educational Attainment

Over the last ten years, educational attainment of the population has improved with the implementation of free education. Population aged 3 and above totalled 539,131, with 34.2% had primary education or lower, down significantly by 20.4 percentage points from 2001. In addition, 49.0% completed junior secondary and senior secondary education, 16.7% completed tertiary education, up by 11.1 and 9.3 percentage points respectively from the past decade. (Table 8)

Chart 7 - Distribution of population by educational attainment (2001 and 2011)

Analysed by gender, the proportion of male who completed senior secondary education (26.1%) and tertiary education (16.8%) increased by 9.8 and 9.0 percentage points respectively from 2001; proportion of female who completed senior secondary education (26.2%) and tertiary education (16.6%) surged by 11.2 and 9.5 percentage points respectively.

5 – Distribution of population by gender and educational attainment

Educational attainment	2001				2011			
	Male	% Share	Female	% Share	Male	% Share	Female	% Share
Total	203,174	100.0	221,029	100.0	258,237	100.0	280,894	100.0
Primary education or lower	109,658	54.0	122,019	55.2	86,048	33.3	98,457	35.1
Junior secondary education	44,314	21.8	50,177	22.7	61,121	23.7	61,985	22.1
Senior secondary education	33,171	16.3	33,079	15.0	67,338	26.1	73,575	26.2
Tertiary education	15,814	7.8	15,611	7.1	43,407	16.8	46,660	16.6
Special education	217	0.1	143	0.1	323	0.1	217	0.1

Excluding non-resident workers and foreign students, 23.9% completed senior secondary education and 15.8% completed tertiary education. (Table 40)

Social and economic development has provided the population with better opportunity to receive higher education. The population who had completed tertiary education totalled 90,067, up by 186.6% over the past ten years. Furthermore, 80,155 (89.0%) had completed degree courses, among them, 85.0% had completed one degree course, 12.8% had completed two degree courses and 2.1% had completed three degree courses. (Tables 8 and 16)

Analysed by field of education, 43.1% studied Social Science, Business & Law; 12.9% studied Humanities & Arts; and 9.9% studied Engineering, Manufacturing & Architecture. As regards the place where the degree was conferred, 35.3% had completed the degree course in Macao, 29.5% in Mainland China and 7.6% in Taiwan region, China.

Language Ability

In Macao, 83.3% (449,274) of the population aged 3 and above frequently used Cantonese as their usual language, down by 4.6 percentage points compared with 2001. With rising number of incoming immigrants and non-resident workers, the proportion of those commonly used Mandarin (5.0%) and English (2.3%) as their usual language rose by 3.4 and 1.6 percentage points respectively from 2001. (Table 9)

With respect to the language ability, 41.4% could speak Mandarin, up by 14.7 percentage points over the past decade; 21.1% could speak English and 2.4% could speak Portuguese. (Table 10)

6 – Language ability

%

Language or dialect	Usual language			Ability to speak language		
	2001	2011	Difference (percentage point)	2001	2011	Difference (percentage point)
Total	100.0	100.0
Cantonese	87.9	83.3	-4.6	94.4	90.0	-4.4
Mandarin	1.6	5.0	3.4	26.7	41.4	14.7
Hokkien	4.4	3.7	-0.7	7.3	6.9	-0.4
Other Chinese dialects	3.1	2.0	-1.1	10.4	8.8	-1.6
Portuguese	0.7	0.7	-	3.0	2.4	-0.6
English	0.7	2.3	1.6	13.5	21.1	7.6
Others	1.7	3.0	1.3	4.3	7.2	2.9

School Attendance

Analysed by age group, the population aged 3-19 totalled 91,198 and 96.3% would attend regular education in the coming school year. Enrolment rate of those aged 20-24 and those aged 25-29 was 41.0% and 12.8% respectively, up by 14.1 and 3.9 percentage points over the past ten years. (Table 11)

Literacy

Population aged 15 and above totalled 486,633 and the literacy rate increased by 4.3 percentage points over the last ten years to 95.6%. Literacy rate of those aged 15-39 reached 99.6% and that of the elderly aged 65 and above stood at 72.6%. (Table 14)

Illiteracy rate of the population aged 15 and above was 4.4%, lower than the 8.7% in 2001, with female population having a higher illiteracy rate (6.3%) than the male (2.2%). The majority of the illiterates who were unable to write and read were the elderly aged 65 and above; illiteracy rate of the female elderly was 40.3% and that of the male elderly was 11.5%, as females were given less opportunity to receive education in the past society compared with males.

Marital Status

Population aged 16 and above totalled 480,073. Analysed by marital status, 31.2% were never-married and 2.7% were separated or divorced, up by 0.9 and 0.6 percentage point compared with the standardized rates in 2001; meanwhile, the proportion of those who were married (62.7%) and widowed (3.4%) declined compared with ten years ago. (Table 13)

7 – Marital status

	%					
	2001	2011	2001	2011	2001	2011
	Total		Male		Female	
Never married	30.3	31.2	32.3	32.3	28.5	30.3
Married	62.8	62.7	64.7	65.1	61.0	60.5
Separated/divorced	2.1	2.7	1.4	1.7	2.7	3.6
Widowed	4.8	3.4	1.6	0.9	7.8	5.7

In the past ten years, the proportion of the never-married female increased by 1.8 percentage points to 30.3%, lower than the 32.3% of the male, yet the difference has narrowed to 2.0 percentage points.

Singulate mean age at marriage of the population aged 16 and above was 29.0, of which the singulate mean age was 29.9 for male and 28.3 for female, an increase of 0.4 year for both genders in comparison with 2001, signifying the tendency of late marriage in both genders.

Excluding non-resident workers and foreign students, singulate mean age at marriage of the population was 29.1; the singulate mean age was 30.1 for male and 28.1 for female.

8 – Singulate mean age at marriage

Gender	2001	2011	
		Total	Excluding non-resident workers & foreign students
Total	28.6	29.0	29.1
Male	29.5	29.9	30.1
Female	27.9	28.3	28.1

Analysed by gender, the proportion of married male (65.1%) was higher than that of married female (60.5%). Analysed by age group, the proportion of married female aged under 35 was slightly higher than that of married male. However, an opposite trend was observed in subsequent age groups where the proportion of married male exceeded that of married female as age ascended. (Table 13)

Chart 8 – Marital status by gender and age group

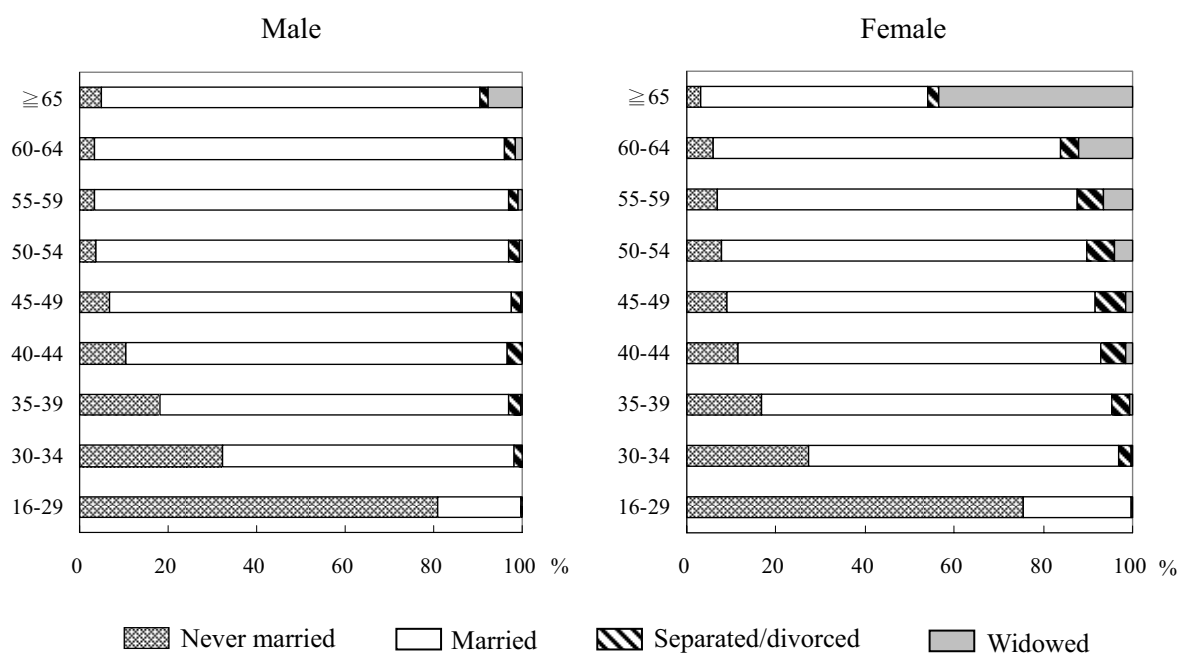

Table 7 indicated that the proportion of those who were separated or divorced increased by 0.6 percentage point from 2001 to 2.7%. Among them, the proportion of separated or divorced female accounted for 3.6% of the female population, far higher than the 1.7% in the male population, since males were more likely to get remarried. Moreover, as female had longer life expectancy, the proportion of widow (5.7%) was also higher than that of widower (0.9%), and the difference was more noticeable in ascending age groups. (Table 13)

Migratory Flow

Land-based population aged 5 and above totalled 529,602, with 203,176 (38.4%) changed residence in the last five years, including 98,904 (48.7%) who moved to the current residence from other places in Macao (internal migration), as well as 51.3% who moved to the current residence from places outside Macao. (Table 12)

Population having internal migration within the Macao Peninsula, the most common move, totalled 76,001 (76.8%). Besides, 10.4% (10,293) moved to Taipa Island from the Macao Peninsula, down by 3.8 percentage points from 2001; the proportion of those (3,994) moved to the Macao Peninsula from Taipa Island increased from 1.4% in 2001 to 4.0% in 2011. Furthermore, internal migration within Taipa Island saw significant increase.

9 - Internal migration

Place of residence 5 years ago	%							
	Residence in 2001				Residence in 2011			
	Total	Macao Peninsula	Taipa Island	Coloane Island	Total	Macao Peninsula	Taipa Island	Coloane Island
Total	100.0	82.0	17.2	0.8	100.0	81.0	18.3	0.7
Other unit in Macao Peninsula	95.2	80.3	14.2	0.6	87.7	76.8	10.4	0.5
Other unit in Taipa Island	4.2	1.4	2.8	0.1	11.9	4.0	7.7	0.1
Other unit in Coloane Island	0.6	0.3	0.2	0.1	0.4	0.1	0.2	0.1

Population who lived outside Macao five years ago totalled 104,272, with 59.1% living in Mainland China, 9.1% in Hong Kong Special Administrative Region and 7.7% in the Philippines.

Place of Previous Residence and Total Duration of Living in Macao

Land-based population who were born outside Macao totalled 325,892, an increase of 83,066 from 2001; the majority (78.3%) were from Mainland China, Hong Kong Special Administrative Region (7.3%) and the Philippines (4.1%). (Table 30)

10 – Distribution of non-Macao born population by place of previous residence

Place of previous residence	2001		2011	
	Total	% Share	Total	% Share
Total	242,826	100.0	325,892	100.0
Mainland China	198,921	81.9	255,334	78.3
Hong Kong Special Administrative Region	17,841	7.3	23,673	7.3
Philippines	5,221	2.2	13,518	4.1
Other Asian countries or territories	13,941	5.7	25,266	7.8
Portugal	1,746	0.7	2,202	0.7
Other countries or territories	5,156	2.1	5,899	1.8

As previously mentioned, economic development drove up the demand for human resources; in fact, population growth in recent years was led by incoming migrants. Table 11 revealed that 26.4% of the population resided in Macao for less than five years and the majority were non-resident workers. (Table 28)

11 – Distribution of non-Macao born population
by place of previous residence and total duration of living in Macao

Place of previous residence	Total	Total duration living in Macao (years)					
		<5	5-14	15-24	25-34	35-49	≥50
		%					
Total	325,892	26.4	20.4	14.0	29.6	5.4	4.2
Mainland China	255,334	20.7	19.8	15.0	35.4	4.2	4.8
Hong Kong Special Administrative Region	23,673	33.0	22.5	14.7	16.5	9.5	3.7
Philippines	13,518	58.8	28.8	11.0	1.1	0.3	0#
Other Asian countries or territories	25,266	55.5	17.1	4.4	5.5	16.9	0.7
Myanmar	4,845	7.9	5.5	6.4	18.3	61.2	0.6
Cambodia	881	2.5	9.3	2.4	6.0	79.2	0.6
Portugal	2,202	25.0	20.7	34.9	13.3	2.7	3.4
Other countries or territories	5,899	49.2	30.5	10.0	5.1	4.5	0.8

Population whose place of previous residence in Mainland China totalled 255,334, with 35.4% having resided in Macao for 25-34 years, the majority were Chinese immigrants moving to Macao in the 1970's and 1980's; in addition, 20.7% moved to Macao because of studying, working or family reunion in last five years, 4.8% had resided in Macao for 50 years or more. (Table 31)

Population whose place of previous residence in Portugal totalled 2,202, with 34.9% having lived in Macao for 15-24 years and 3.4% for 50 years or more.

Population with place of previous residence in other Asian countries or territories totalled 25,266, with 17.6% having resided in Macao for 35 years or more, mostly from Myanmar (2,996) and Cambodia (703); the majority were returning Chinese from Southeast Asia who moved to Macao in the 1960's and 1970's.

Economic Activity Status

In the last ten years, labour force (economically active population) aged 16 and above increased by 50.2% from 2001 to 346,497, attributable to the increase in number of incoming migrants and non-resident workers; moreover, increase in the female labour force reached 58.0%, higher than the 43.4% rise of the male. (Table 17)

12 – Labour force (economically active population)

	2001		2011			
	Total	Structure (%)	Total	Structure (%)	Excluding non-resident workers & foreign students	Structure (%)
Total	230,670	100.0	346,497	100.0	285,401	100.0
Male	123,305	53.5	176,818	51.0	147,431	51.7
Female	107,365	46.5	169,679	49.0	137,970	48.3

Labour force participation rate was 72.2%, up by 2.9 percentage points over the past decade. More job opportunities amid tight labour market boosted the labour force participation rate of the female to 67.2%, up by 6.5 percentage points from 2001; however, the male labour force participation rate stood at 77.7%, down by 1.4 percentage points. Difference between the male and female labour force participation rates narrowed substantially from 18.4 percentage points in 2001 to 10.5 percentage points in 2011.

13 - Labour force participation rate

	2001	2011	
		Total	Excluding non-resident workers & foreign students
		Total	69.3
Male	79.1	77.7	75.2
Female	60.7	67.2	63.6

Excluding non-resident workers and foreign students, size of the local labour force was 285,401, with male and female accounted for 51.7% and 48.3% respectively. Labour force participation rate of the local population was 69.1%, with that of the male at 75.2% and female at 63.6%. (Table 43)

Number of employed population (total employment) was 337,716. With rapid development of the tourism and gaming sector, an analysis of the employed by industry revealed that 175,821 were working in Recreational, Cultural, Gaming & Other Services; Hotels, Restaurants & Similar Activities; and Wholesale & Retail Trade, altogether taking up 52.1% of total employment, a notable increase of 14.0 percentage points from 2001. As the economy has undergone structural changes; therefore, only 3.4% were working in the Manufacturing sector, down substantially by 16.4 percentage points compared with ten years ago. (Table 21)

Domestic workers accounted for 5.0% (16,863) of total employment, up by 2.8 percentage points from 2001, the majority were non-resident domestic helpers. With improvement in the employment situation, non-resident domestic helpers enabled the re-entrance of some housewives to the labour force that helped to raise the labour force participation rate of the female population.

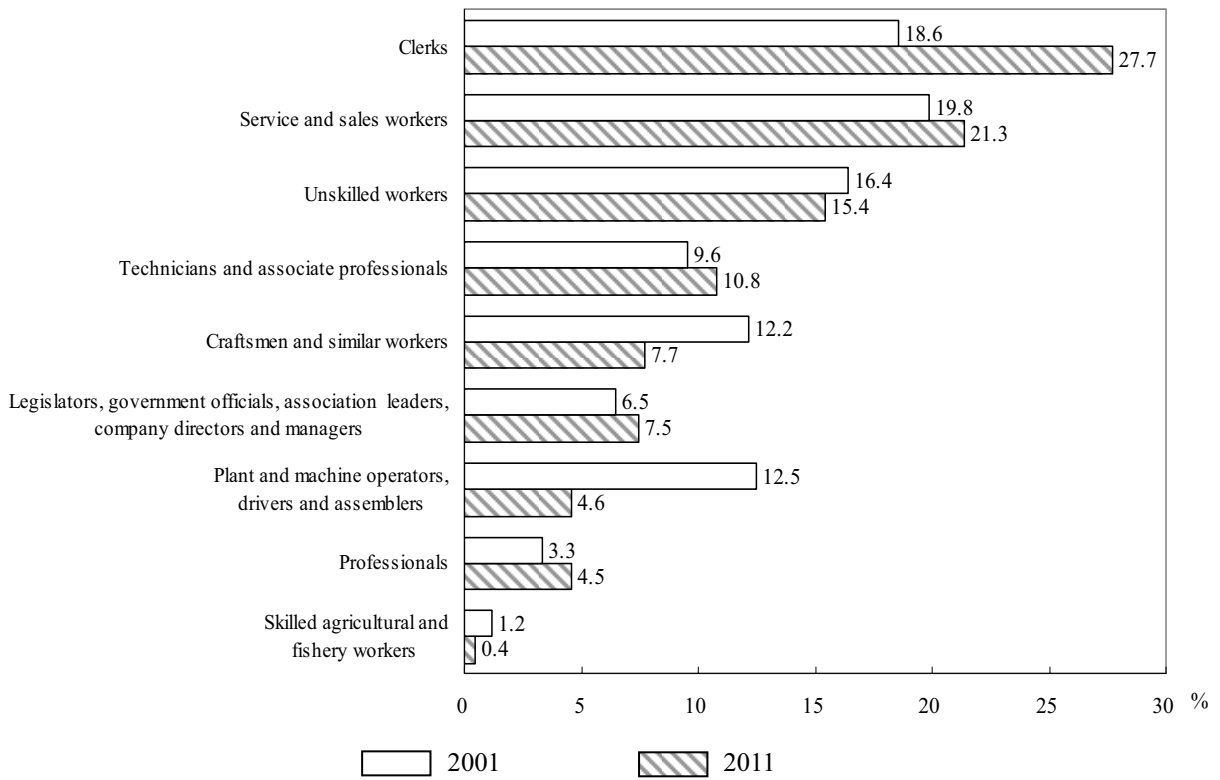

Chart 9 – Distribution of total employment by industry

Structural change of the economy towards the service sector modified the occupations of the employed population. Analysed by occupation, 27.7% (93,686) were Clerks (including croupiers, floorpersons, cage cashiers, etc), up by 9.1 percentage points from ten years ago; 21.3% were Service & Sales Workers, and 15.4% were Unskilled Workers. Over the past ten years, job structure of the Unskilled Workers experienced significant changes, from mostly factory janitors or porters in the past to cleaners of the service sector (hotels, restaurants, gaming, etc.) or domestic helpers. (Table 22)

In view of higher educational attainment of the population and development of the economy, 22.8% of the employed were managers, professionals and associate professionals, up by 3.4 percentage points from 2001. As the importance of the conventional manufacturing sector was diminishing, the proportion of Craftsmen & Similar Workers (7.7%); and Plant & Machine Operators, Drivers & Assemblers (4.6%) decreased by 4.5 and 7.9 percentage points respectively from 2001.

Chart 10 – Distribution of total employment by occupation

Median employment earnings of the employed population for July 2011 amounted to MOP10,000, which was twice of the median employment earnings (MOP 5,000) for July 2001. (Table 25)

Excluding non-resident workers and foreign students, median employment earnings of the local employed population was MOP 11,000. (Table 44)

3. Marine Population

2011 Marine Population Census covered 234 occupied vessels, a decrease of 136 from ten years ago. The marine population totalled 735, down notably by 1,163 from 2001. (Table 1)

Analysed by gender, male and female accounted for 76.3% and 23.7% respectively. In respect of age structure, the adult population (aged 15-64) made up 96.3% of the total marine population. In terms of place of birth, the proportion of the marine population born in Mainland China stood at 45.3% and those born in Macao shared 34.1%. The majority (57.0%) of the marine population had primary education or lower. As regards the marital status, 88.6% were married and 10.6% were never-married. Analysed by status in employment, 42.6% were employees and unpaid family workers shared 27.1%.

14 – Characteristics of the marine population

Characteristics	2001		2011	
	No.	Structure (%)	No.	Structure (%)
Total	1,898	100.0	735	100.0

Employee	982	55.5	303	42.6
Unpaid family worker	421	23.8	193	27.1

4. Population with Disability

In Macao, the 2001 Population Census was the first attempt to collect information on the population with disability, using the self-defined approach. Subsequently, uniformed criteria in defining those with disability were adopted in the 2006 By-Census and the 2011 Population Census, i.e. hindered by physical, intellectual, mental or psychiatric conditions, an individual had difficulty in carrying out daily activities, even with auxiliary equipment, and assistance is required; the difficulty has lasted or is expected to last for six months or more. Therefore, data on the population with disability from the 2011 Population Census are compared directly with those of the 2006 By-Census.

Results of the 2011 Population Census indicated that the population with disability totalled 11,141, an increase of 2,843 in comparison with 2006. The proportion of population with disability accounted for 2.0% of the total population, up by 0.3 percentage point from five years ago. (Table 46)

Analysed by age group, the proportion of those with disability to the youth population stayed unchanged at 0.4%, same as 2006; the proportion of the disabled to the adult population (1.2%) and the elderly population (13.5%) increased by 0.4 and 0.1 percentage point respectively from 2006. As regards gender of the population with disability, 41.4% were male and 58.6% were female.

15 – Distribution of population with disability by age group (2006 and 2011)

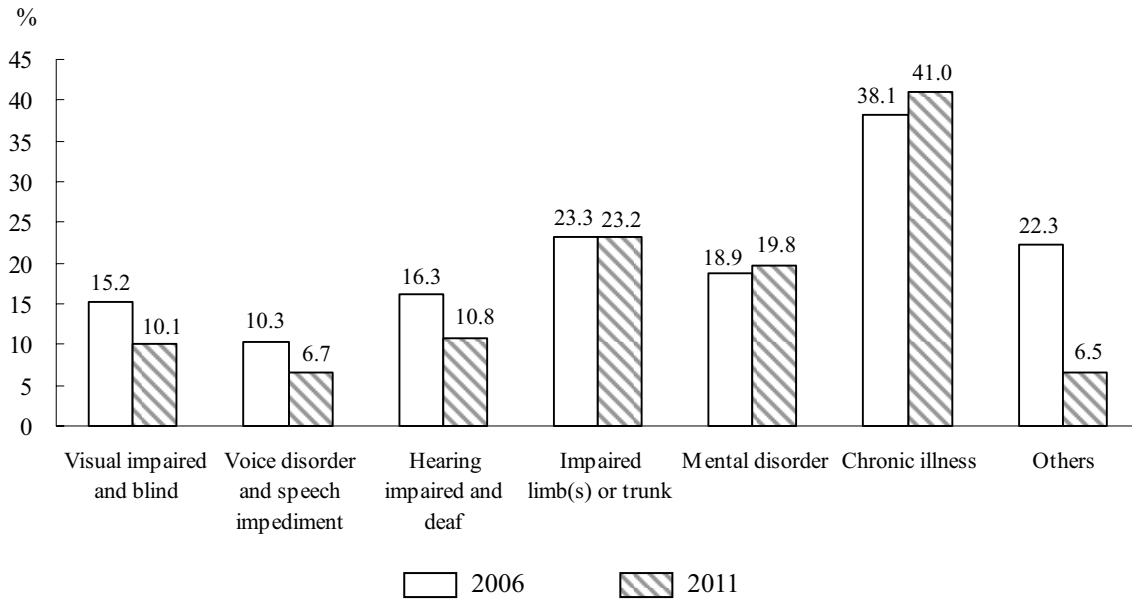

Age group	2006			2011		
	Total	Population with disability	% of Total	Total	Population with disability	% of Total
Total	502,113	8,298	1.7	552,503	11,141	2.0
0-14	76,406	302	0.4	65,870	256	0.4
15-64	390,352	3,252	0.8	446,669	5,474	1.2
≥65	35,355	4,744	13.4	39,964	5,411	13.5

With respect to the educational attainment, 71.1% (7,901) had primary education or lower, 12.9% completed junior secondary education, 9.0% completed senior secondary education and 3.7% had tertiary education.

Analysed by cause of difficulty, 41.0% (4,565) of the disabled who had difficulties in carrying out daily activities were caused by chronic illness, up by 2.9 percentage points from 2006, with 26.5% aged 40-59 and 70.1% aged 60 and above. (Table 48)

In addition, 23.2% (2,582) of the disabled were caused by impaired limb(s) or trunk, down by 0.1 percentage point; 19.8% (2,205) were caused by mental disorder, up by 0.9 percentage point from 2006.

Chart 11 – Distribution of population with disability by cause of difficulty

Note: Difficulty can be caused by multiple causes.

Analysed by type of difficulty, 60.5% had difficulties in mobility, 38.7% had difficulties in self-care and 30.3% had difficulties in communication. (Table 49)

In respect to the duration of having difficulty, 29.8% experienced difficulties for less than 5 years, 25.7% experienced difficulties for 5-9 years, 17.1% experienced difficulties for 10-14 years and 13.3% experienced difficulties for 25 years or more. (Table 50)

Regarding housing, Table 16 indicated that 9,694 persons with disability (87.0%) were living in residential units, of which 1,180 persons (10.6%) were one-person household; meanwhile, 1,397 persons were living in institutes or other collective living quarters. In terms of type of housing, 75.7% were residing in private housing, 13.9% in economic housing and 10.4% in social housing.

16 – Housing characteristics of population with disability

Housing characteristics		2011	
		No.	Structure (%)
Type of unit	Total	11,141	100.0
	Residential unit	9,694	87.0
	1-person household	1,180	10.6
	Collective living quarters	1,397	12.5
	Others	50	0.4
Type of housing	Total	9,694	100.0
	Private housing	7,340	75.7
	Economic housing	1,350	13.9
	Social housing	1,004	10.4

5. Household

Household Size

Total number of households was 170,769, up by 26.5% compared with ten years ago, including 234 households of the marine population. Although total number of households registered an increase, yet the average household size dropped to 3.08 persons per household, a decrease of 0.06 in comparison with 2001.

Average household size decreased continuously in the last ten years. An analysis of the household size revealed that the proportion of 2-person households predominated, at 23.3%, up by 3.6 percentage points from 2001. However, the proportion of 4-person households, the largest in 2001, decreased by 2.8 percentage points over the past ten years to 23.0%. One-person households accounted for 15.2% of the total, down by 1.9 percentage points from 2001. (Table 68)

17 – Household size

Household size	2001		2011	
	No.	% Share	No.	% Share
Total	134,965	100.0	170,769	100.0
1 person	23,117	17.1	25,984	15.2
2 persons	26,566	19.7	39,862	23.3
3 persons	28,790	21.3	39,621	23.2
4 persons	34,779	25.8	39,280	23.0
5 persons	14,829	11.0	16,750	9.8
≥ 6 persons	6,884	5.1	9,272	5.4
Average household size	3.14		3.08	

Household Composition

Relationship of the household members enables classification of three types of household composition, i.e. “one-person household”, “nuclear household” and “no nuclear household”. A family nucleus is composed of a couple or a single parent with unmarried child(ren); a household with one or more family nuclei is considered as a nuclear household.

There were 130,910 nuclear households, accounting for 76.7% of total; the majority (38.2%) were composed of a couple with unmarried child(ren), down by 4.1 percentage points from ten years ago. Nuclear households composed of a couple shared 14.0% of the total, up by 3.3 percentage points from 2001.

Moreover, there were 3,542 nuclear households composed of married child(ren) and parents, an upsurge of 206.4% compared with 2001, indicating that married child(ren) living with parents become a common phenomenon in past ten years. However, the proportion of nuclear households with three generations living together (i.e. father/mother with unmarried child(ren) and parents) was 5.6%, down by 0.8 percentage point from 2001, signifying the trend of big family no longer prevailed.

A household composed of two or more members, e.g. brothers, friends, etc., living together without forming a family nucleus is considered a “no nuclear household”. There were 13,875 no nuclear households, up by 1.4 percentage points from 2001 to account for 8.1% of the total, composed mainly of non-related members such as non-resident workers living together.

There were 25,984 one-person households, sharing 15.2% of the total, down by 1.9 percentage points from ten years ago.

Analysed by statistical areas, 85.9% of the households living in Guia were nuclear households, the highest of all areas. NAPE & Aterros da Baía da Praia Grande had the highest percentage share of one-person households (25.3%) and no nuclear households (22.8%) living there.

18 - Household composition

Household composition	2001		2011	
	No.	Structure (%)	No.	Structure (%)
Total	134,965	100.0	170,769	100.0
One-person household	23,117	17.1	25,984	15.2
Nuclear household	102,854	76.2	130,910	76.7
A couple	14,395	10.7	23,904	14.0
A couple and unmarried child(ren)	57,088	42.3	65,201	38.2
Single parent and unmarried child(ren)	13,676	10.1	14,668	8.6
Married child(ren) and parents	1,156	0.9	3,542	2.1
Father/mother, unmarried child(ren) and parents	8,620	6.4	9,647	5.6
Others	7,919	5.9	13,948	8.2
No nuclear household	8,994	6.7	13,875	8.1
Relative household	4,228	3.1	6,376	3.7
Non-relative household	4,766	3.5	7,499	4.4

Monthly Household Employment Earnings

Over the past ten years, economic development generated more jobs and better income. Average number of employed persons per household was 1.85, higher than 1.53 in 2001. Median monthly employment income of household in July 2011 amounted to MOP 23,700, far higher than MOP 9,000 in 2001, at an average annual growth rate of 10.2%.

Household employment earnings had close relationship with the number of working members. The majority (59,848) of the households had two members working, and median employment earnings soared by 126.9% compared with ten years ago. For the 49,288 households with one member working, median employment earnings soared by 122.7%.

19 – Median employment earnings of households

Working Members	2001			2011			Change (%)
	No.	% Share	Median earnings (MOP)	No.	% Share	Median earnings (MOP)	
Total	116,669	100.0	9,000	151,628	100.0	23,700	163.3
1 person	53,362	45.7	5,500	49,288	32.5	12,250	122.7
2 persons	46,405	39.8	11,000	59,848	39.5	24,964	126.9
3 persons	11,447	9.8	15,000	28,894	19.1	32,000	113.3
4 persons	3,657	3.1	17,700	10,033	6.6	38,500	117.5
≥ 5 persons	1,798	1.5	19,000	3,565	2.4	47,000	147.4

Possession of Motor Vehicles

Total number of households possessing motor vehicle continued to rise in the past ten years. There were 170,535 households of the land-based population and 93,749 (55.0% of the total) had private car and/or motorcycle under their possession. Among the households possessing motor vehicle, 40,240 had motorcycle and 23,986 had private car; number of households possessing both motorcycle and private car increased to 29,523 in 2011, up significantly by 14,198 in comparison with 2001. (Table 76)

In spite of smaller household size, a total of 47,118 households were having more than one motor vehicle under their possession, up by 24,362 from 2001; in particular, 16,451 had three or more motor vehicles. (Table 77)

The ratio of motor vehicles and households stood at 57 motorcycles and 39 private cars per 100 households, an increase of 20 motorcycles and 10 private cars respectively compared with 2001.

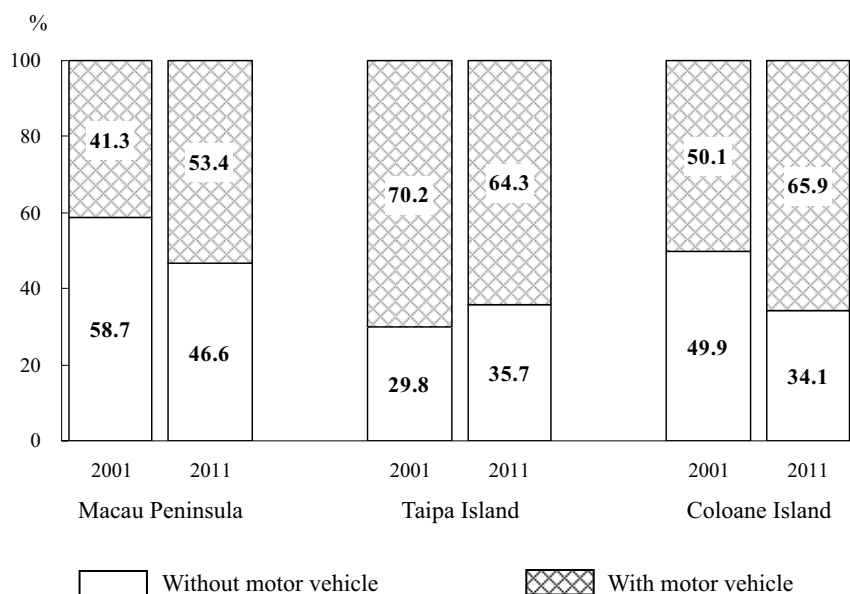

20 – Household-owned motor vehicles

	2001		2011	
	No.	% Share	No.	% Share
Total	134,595	100.0	170,535	100.0
With motor vehicle	59,726	44.4	93,749	55.0
Motorcycle only	26,012	43.6	40,240	42.9
Private car only	18,389	30.8	23,986	25.6
Motorcycle and private car	15,325	25.7	29,523	31.5
Number of motor vehicles				
1	36,970	61.9	46,631	49.7
2	17,284	28.9	30,667	32.7
≥ 3	5,472	9.2	16,451	17.5
Without motor vehicle	74,869	55.6	76,786	45.0
Motorcycles per 100 households		37		57
Private cars per 100 households		29		39

Chart 12 showed that 53.4% of the households living in the Macao Peninsula possessed motor vehicles, up by 12.1 percentage points from 2001 when the rate of increase in Coloane Island reached 15.8 percentage points; in Taipa Island, proportion of households possessing motor vehicles decreased by 5.9 percentage points over the past ten years to 64.3%. (Table 76)

Number of household-owned private cars totalled 67,280, of which 76.1% were parked at private car-park at night; household-owned motorcycles totalled 96,752, with 71.3% parked on the street at night. (Tables 79 and 80)

Chart 12 – Household-owned motor vehicles in Macao Peninsula and the Islands

6. Housing

Coverage of Units

2011 Population Census covered a total of 233,870 units of different types, of which 231,908 were building units, including 189,861 residential units.

21 – Type of unit

	Total	Building unit	Temporary unit	Others
Total	233,870	231,908	988	974
Macao Peninsula	202,352	201,194	441	717
Taipa Island	29,813	29,449	237	127
Coloane Island	1,705	1,265	310	130

Analysed by occupancy of the building units, number of vacant building units (for sale/for rent) totalled 22,430; therefore, the vacancy rate of building units stood at 9.7%. Number of vacant residential units was 13,382 and the respective vacancy rate was 7.0%; meanwhile, the vacancy rate of commercial and other units was 23.3%.

Coloane Island had the highest vacancy rate of residential units, at 20.2%; vacancy rate of residential units in Taipa Island was 6.9%. For the commercial and other units, Coloane Island also had the highest vacancy rate of 24.3%, while the lowest rate was in Taipa Island, at 20.5%.

22 – Vacant building units

	Building unit			Residential unit			Commercial & other unit			Collective living quarter
	Total	Vacant	Vacancy rate (%)	Subtotal	Vacant	Vacancy rate (%)	Subtotal	Vacant	Vacancy rate (%)	
Total	231,908	22,430	9.7	189,861	13,382	7.0	38,777	9,048	23.3	3,270
Macao Peninsula	201,194	19,934	9.9	162,316	11,354	7.0	36,527	8,580	23.5	2,351
Taipa Island	29,449	2,240	7.6	26,503	1,818	6.9	2,061	422	20.5	885
Coloane Island	1,265	256	20.2	1,042	210	20.2	189	46	24.3	34

Housing Characteristics

After more units were built, the once common scene of several households sharing the same house nearly disappeared. Land-based households totalled 170,535 and the average number of households per building unit was 1.01, a decrease of 0.02 compared with 2001.

Analysed by type of building unit, there were a total of 168,937 households living in residential units. Among these households, 146,620 (86.8%) were living in private housing, with an average household size of 3.08; besides, 16,462 (9.7%) were living in economic housing, with an average

household size of 3.30; a total of 5,855 (3.5%) were living in social housing and the average household size was 2.71. (Table 71)

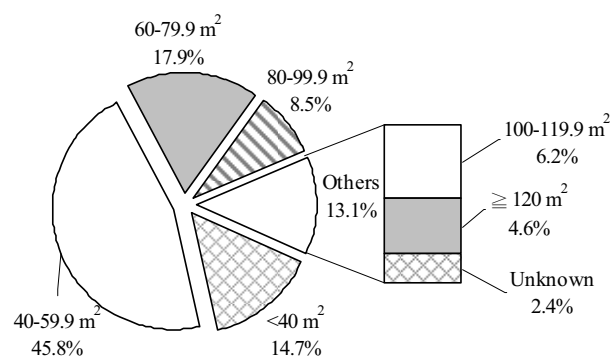

Analysed by year of building completion, there were 81,716 households (48.4% of total) living in residential units that were completed in 1990-1999, a substantial increase of 14,926 from 2001. Meanwhile, 45,122 (26.7%) living in units that were completed in 1980-1989, while 19,723 (11.7%) in units that were completed in 2000 and after. (Table 72)

23 – Households by year of building completion

Year of completion	2001		2011	
	No.	% Share	No.	% Share
Total	133,005	100.0	168,937	100.0
Before 1980	21,011	15.8	22,137	13.1
1980-1989	41,289	31.0	45,122	26.7
1990-1999	66,790	50.2	81,716	48.4
2000 and after	2,331	1.8	19,723	11.7
Unknown	1,584	1.2	239	0.1

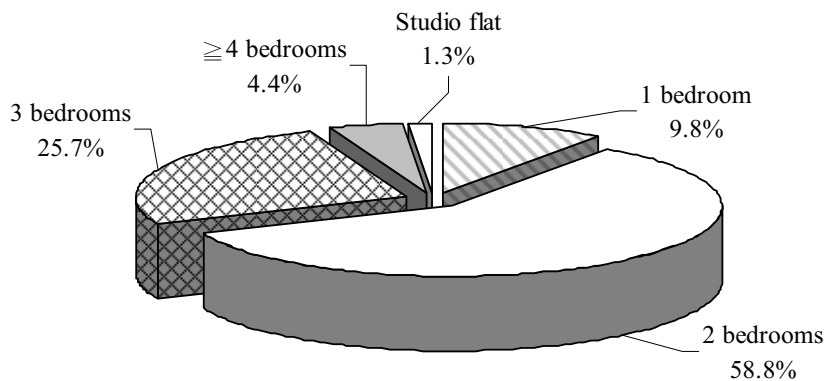

Analysed by usable area of the residential unit, the majority (45.8%) of households were living in residential units with a usable area of 40-59.9 square meters, 17.9% in units with a usable area of 60-79.9 square meters and 4.6% in units with a usable area of 120 square meters and above. Per capita living space stood at 20.1 square meters.

Chart 13 – Distribution of households by usable area of residential unit

Analysed by number of bedrooms, 58.8% of the households were living in 2-bedroom units, 25.7% in 3-bedroom units and 9.8% in 1-bedroom units. Average number of bedrooms per residential unit was 2.2 and the average number of bedrooms per person was 0.7.

Chart 14 – Distribution of households by number of bedrooms

Analysed by household size, Table 24 indicated that the majority (67.8%) of the 3-person households were living in 2-bedroom units, 24.1% in 3-bedroom units. As regards the 4-person households, 59.7% were living in 2-bedroom units and 32.6% in 3-bedroom units.

24 – Distribution of households by household size and number of bedrooms

	Household size						%
	1-person	2-person	3-person	4-person	5-person	≥ 6 persons	
Total	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Studio flat	5.2	1.7	0.4	0.2	0.1	0.2	
1 bedroom	26.8	15.4	5.4	2.9	1.7	1.4	
2 bedrooms	51.4	63.7	67.8	59.7	47.6	36.0

≥4 bedrooms	2.0	2.4	2.4	4.6	8.9	20.2	

Tenure of Residential Unit

Over the last decade, population size and number of households increased amid the shrinking household size; as a result, there were 119,578 households (70.8% of the total) who were owner-occupiers of their residential units, an increase of 17,276 compared with 2001 but the proportion of owner-occupiers decreased by 6.1 percentage points from 2001. Furthermore, there were 41,376 households (24.5%) who were tenants of the residential units on account of rising property prices, increasing demand on rental dwellings of non-resident workers, etc., up by 5.5 percentage points from ten years ago. (Table 69)

Moreover, a total of 86,595 households who were mortgage free owner-occupiers of their residential units, an increase of 23,530 compared with 2001; there were 32,983 owner-occupiers who had mortgage to repay, a decrease of 6,254 from ten years ago, indicating that some households have fully repaid their mortgage over the last decade and the new additions were mostly tenants. (Table 70)

25 – Households by tenure of residential unit

	2001		2011		Change (%)
	No.	% Share	No.	% Share	
Total	133,005	100.0	168,937	100.0	..
Owner-occupier	102,302	76.9	119,578	70.8	16.9
Mortgage free	63,065	61.6	86,595	72.4	37.3
With mortgage	39,237	38.4	32,983	27.6	-15.9
Tenant	25,243	19.0	41,376	24.5	63.9
Employer provided	2,786	2.1	2,303	1.4	-17.3
Others	2,674	2.0	5,680	3.4	112.4

Rent and Mortgage Payment of Residential Unit

There were 32,983 owner-occupiers who had to repay mortgage for their residential unit. Analysed by the amount of mortgage payment, 20.2% repaid less than MOP 3,000 per month, 32.4% repaid MOP 3,000-MOP 5,999 per month, and 23.4% repaid MOP 10,000 and above per month. Median monthly mortgage repayment of household amounted to MOP 5,390, an increase of MOP 2,590 (+92.5%) compared with 2001. (Table 70)

Average monthly mortgage payment of household amounted to MOP 7,173. Analysed by statistical area, Coloane Island had the highest average of MOP 20,377, while Cidade & Hipordromo of Taipa Island had the lowest average of MOP 3,555.

Chart 15 – Distribution of households by monthly mortgage payment

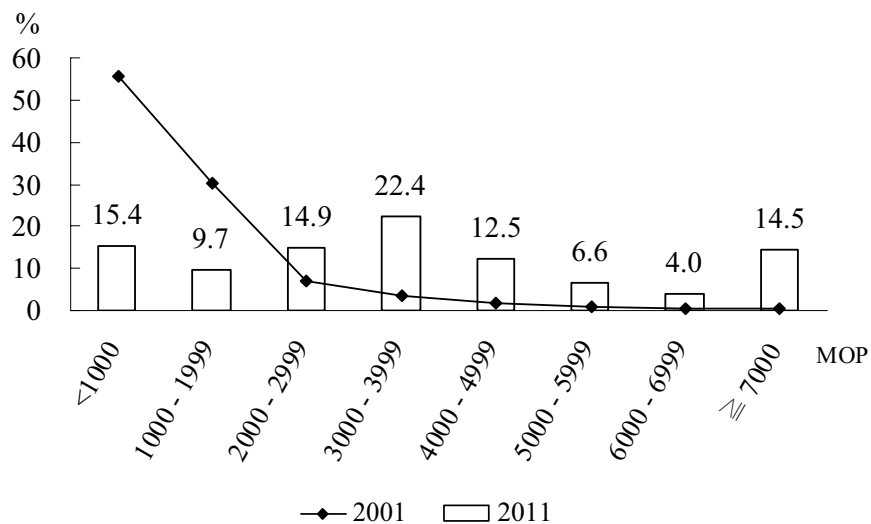

There were 41,376 households who were tenants of the residential units and the median monthly rent payment amounted to MOP 3,204, a three-fold increase from ten years ago. Analysed by the amount of rent payment, 25.1% of the households paid less than MOP 2,000 per month and 37.3%

paid MOP 2,000-MOP 3,999 per month. (Table 70)

Average monthly rent payment of household amounted to MOP 4,169. Analysed by statistical area, NAPE had the highest average of MOP 15,241, while Ilha Verde had the lowest average of MOP 1,435.

Chart 16 – Distribution of households by monthly rent payment

7. Distribution of Population by Statistical Area

Analysed by statistical area, the more densely populated areas were Areia Preta & Iao Hon; NATAP; Baixa da Taipa; Barca; Tamagnini Barbosa; as well as Barra & Manduco, altogether having a population size of 299,226 (54.2% of total population), an increase of 62,386 compared with 2001. (Tables 2, 3, 4)

Population in Baixa da Taipa and NATAP registered the fastest growth of 89.8% (+26,213) and 46.7% (+18,216) respectively over the last ten years, higher than the 26.9% increase of the total population, which was owing to the completion of more residential units and more incoming migrants living in these areas, in particular, 19,169 living in Baixa da Taipa were incoming migrants after 2001.

26 – Densely populated statistical areas

Statistical area	Total	Population change		Change in residential unit		Incoming migrant after 2001	
		No.	Change (%)	No.	Change (%)	No.	% of Total
Total	552,503	117,268	26.9	18,539	10.6	126,967	23.0
Areia Preta & Iao Hon	66,875	7,599	12.8	239	1.2	15,030	22.5
NATAP	57,249	18,216	46.7	3,582	25.0	13,630	23.8
Baixa da Taipa	55,412	26,213	89.8	5,632	39.2	19,169	34.6
Barca	43,668	3,872	9.7	193	1.2	7,698	17.6
Tamagnini Barbosa	38,263	2,008	5.5	-38	-0.3	7,433	19.4
Barra & Manduco	37,759	4,478	13.5	447	3.3	7,909	20.9

Moreover, population living in Areia Preta & Iao Hon; Barca; Tamagnini Barbosa; as well as Barra & Manduco increased at a lower growth rate than that of the total population; the slowdown in population increase was caused by more people moving out of these areas.

Total land area measured 29.9 square kilometres in 2011, increasing at an average annual growth of 1.5% over the past decade, lower than the average annual growth of 2.4% of the total population; therefore, population density climbed further to 18,478 per square kilometre, an increase of 1,608 (+9.5%) in comparison with 16,870 per square kilometre in 2001.

Analysed by statistical area, population density in all areas of the Macao Peninsula were higher than those of the Islands. The area of Areia Preta & Iao Hon had the highest population density of 148,611 per square kilometre and Coloane Island had the lowest of 323 per square kilometre. However, it was noteworthy that the Islands are having major residential projects in progress; therefore, population size and population density of the Islands are expected to increase in the future.

27 – Population density by statistical area

Statistical area	2001		2011		Change in population density (%)

8. Supplementary Data

According to the administrative records, there are 7,449 Macao residents living in Zhuhai and the neighbouring areas who commute to Macao to study or work. Gender and age structure of the residents are as follows:

Age group	Total	Male	Female
Total	7,449	4,933	2,516
0-4	284	150	134
5-9	335	166	169
10-14	323	170	153
15-19	335	173	162
20-24	291	186	105
25-29	420	271	149
30-34	509	312	197
35-39	749	427	322

Explanatory Notes

Macao has conducted 14 population censuses. The 1991 Census is the last population census prior to the Handover of Macao and the 2001 Census is the first census operation after commencement of the 21st Century and the Handover. Population census aims to have a better comprehension on the population size and detailed demographic characteristics, namely age, gender, educational attainment, economic activity status, housing characteristics, etc. Census data are essential reference to the Government in the formulation of policy on education, housing, transportation, health, social services, etc., that are also important to private enterprises in planning of business strategies and to academic institutions in research studies.

Following the social and economic development in the past ten years, the population structure, composition, distribution, and even housing characteristics have undergone considerable changes; therefore, the 2011 Population Census is most appropriate to reflect the latest situation on the demographic structure and the socio-economic characteristics of the Macao population

Coverage and Scope

2011 Population Census is the 15th Population Census and the 5th Housing Census of Macao. Coverage of the 2011 Population Census included all units of the Macao Special Administration Region that were used for housing, commercial or other purposes; the observation unit was the individuals living or staying in these units, excluding military personnel and facilities of the People's Liberation Army of the People's Republic of China stationed in Macao.

Population of Macao composes of the land-based population and the marine population. Hence, coverage of the 2011 Population Census also included vessels berthed in the customary water of Macao.

Census Reference Moment

For the land-based population, the census reference moment when the data collected should take reference to, was 3 a.m. on 12 August 2011. Data collection of the marine population was carried out from 1-6 July, taking advantage of the fishing moratorium period, and in order to stay near with the data collection period of the land-based population.

Data Collection

The 15-day data collection of the 2011 Population Census started 12-26 August 2011. Population census was the largest statistical operation and required an enormous group of staff; as a result, 14 Census Stations were set up in different areas, recruiting more than 2,700 students of

post-secondary education.

Two types of questionnaires were used in the 2011 Population Census, viz. the Short-form and the Long-form. The Short-form aimed to gather data on basic characteristics such as gender, month and year of birth, etc. Moreover, one-seventh of the building units were selected by random sampling and enumerated with the Long-form to gather detailed information on ethnicity, nationality, place of previous residence, educational attainment, employment, employment earnings, etc. of the respondents.

To cope with the latest development of the society and growing concern of the public, content of the 2011 Census questionnaires was adjusted to collect, from the non-Macao born population, additional information on the purpose of coming, housing, etc. in order to understand better the characteristics and latest situation of different population groups, for example, non-resident workers and foreign students living in Macao. The data enabled conduct of independent analysis on the trend of ageing and gender structure of the local population after the exclusion of non-resident workers and foreign students. Given the importance of comprehensive data on human resources to the social and economic development of Macao; detailed information on degree courses, multi-degree holders, field of education, etc. were collected from respondents who had completed tertiary education.

Encouraged by the growing popularity and rapid advancement of Information Technology (IT), the Statistics and Census Service (DSEC) maximized the application of IT in data collection and data processing of the 2011 Census, to enhance the efficiency of work and quality of data, to minimize errors and omissions, etc. In particular, capacity and functions of the Computer Assisted Telephone Interviewing (CATI) system was expanded to handle more calls, enquiries and appointments simultaneously. To cater for the different work schedules of the respondents, apart from the traditional mode of paper and pen recording, DSEC introduced the e-reporting system of the Short-form that enabled respondents to complete the Short-form at their convenience. To enhance work efficiency and reduce re-visits of households, the Long-form census officers were equipped with tablet computer to collect, record, store and operate validation check of the information gathered directly from the households.

Statistical Confidentiality

In respect of statistical confidentiality and protection of personal data, DSEC accords top priority to comply with the stipulations of the Dispatch 242/GM/99 in collecting and processing of personal data gathered in the 2011 Population Census. Information collected is used solely for statistical purposes; results will be disseminated in aggregated manner to ensure no individual data is disclosed. To ensure conformity to safeguard statistical confidentiality, participating staff is required to sign a compliance declaration in this regard, and the offender is subject to bear the legal

responsibilities that may follow.

Applicability of Principal Characteristics

In view of the differences of various population groups, some principal characteristics are applicable only to specific groups of the population, as follows:

Principal Characteristics	Applicable to Population Group
Place of previous residence; Total duration of living in Macao	Non-Macao born land-based population
Educational attainment; Language ability	Population aged 3 and above
Attending school	Land-based population aged 3 and above
Migratory flow	Land-based population aged 5 and above
Literacy rate; Illiteracy rate	Population aged 15 and above
Marital status; Economic activity status	Population aged 16 and above
Possession of motor vehicle; Tenure of residential unit; Rent/mortgage payment; Housing characteristics	Land-based households

Blank page

Sampling

For sampling purposes, the whole of Macao was subdivided into 23 statistical areas and the marine population. To ensure precision of sampling and extrapolation of results, the marine population and the sparsely populated areas were required to complete the Long-form. For the rest of the statistical areas, one-seventh of the building units were selected and the individuals living in those units were required to answer the Long-form. Meanwhile, to minimize the biases caused by the coincidence between the sampling intervals and location of the building units, five random starts were used in the sample selection process.

Statistical Inference

To avoid the inconsistency between the extrapolated estimates of the Long-form and full enumerated data of the Short-form, census results would be used as the control total in the adjustment of sample data. The formula is given below:

$$\hat{Y} = \sum_{i=1}^k \hat{Y}_i = \sum_{i=1}^k y_i * \frac{N_i}{n_i}$$

of which,

N_i - Population size of a specific age and gender group (i) in selected area

n_i - Sample population of a specific age and gender group (i) in selected area

y_i - Sample population having certain characteristic(s), of a specific age and gender group (i) in selected area

\hat{Y}_i - Estimated population size having certain characteristic(s), of a specific age and gender group (i) in selected area

\hat{Y} - Estimate of total population having certain characteristic(s).

Quality Control

The applicants qualified to attend the Census training were selected, from about 8,000 applications, after analysis of curriculum vitae, written test and interview. To ensure the participating staff would complete the data collection process in line with the procedures prescribed, suitable applicants to various job positions were selected according to the performance in the training course, exercise and examination results.

For quality assurance, data collected were required to pass through a series of vigorous logical validation and processing. The Short-forms collected by the census officers would be checked manually and then scanned at the Census Station for computer validation to rectify error or omission

as soon as possible. Tablet computers of the Long-form census officers were equipped with simultaneous logical validation and correction functions. Similarly, data submitted online via the e-questionnaire were subject to immediate validation and re-verification of basic data of households by the census staff.

Upon conclusion of the data collection of the 2011 Census, a nine-day Post Enumeration Survey (PES) was carried out from 1-9 September 2011; about 3,000 households would be selected from all completed cases for re-interview to evaluate quality of the Census data by comparing the information of the questionnaires. Results of the PES indicated that data quality of the 2011 Population Census measures up to international standard; data omission rate stood at 0.1%, far lower than the 3% or less as international standard required.

Standard error of principal demographic characteristics

Glossary

Age

At the census reference moment, the number of complete years an individual has passed since birth.

Ageing ratio

The percentage share of the elderly population (aged 65 and above) to the youth population (aged 14 and below).

Attending school

Individuals aged 3 and above receiving regular education in educational institutions.

Collective living quarter

Unit(s) managed by specific institution or entity that is engaged in provision of accommodation or arrangement for living to certain population group. Collective living quarter includes:

- Hotels and similar establishments
- Institutions or infirmaries
- Staff quarters
- Other collective living quarters

Disability

For congenital or acquired reasons, the physical, intellectual, mental or psychiatric conditions of an individual are affected; even with auxiliary equipment, the individual still has difficulty in carrying out daily activities and assistance is needed; the difficulty has lasted or is expected to last for six months and more.

Economic activity status

It refers to the characteristics of an individual's participation in economic activities. The population can be divided into the economically active population and the economically inactive population.

Economically active population

Individuals aged 16 and above who are available to participate in the production of goods and/or services during the reference period. It comprises the employed and the unemployed.

Economically inactive population

Individuals who are not considered as employed or unemployed during the reference period, e.g. those who have not worked because of schooling, housework, retirement, sickness, etc. and have not sought work during the last 30 days.

Educational attainment

The highest level of education an individual successfully completed. "Primary education" refers to completion of grade six; those who fail to complete grade six are considered as "Primary education-incomplete".

Elderly dependency ratio

The percentage share of the elderly population (aged 65 and above) to the adult population (aged 15-64).

Employed population

Individuals aged 16 and above who work for pay, profit or family gain for at least 1 hour during the reference period. Including employees who are absent from work but have formal job attachment to employer, as well as company owners or shareholders who are temporary away from work because of particular reason.

Employment earnings

For the employees, it is the working income received; for the employers and the self-employed, it is the difference between the value of production less cost of production and depreciation of assets.

Ethnicity

Consanguinity or blood relation formed and determined naturally by birth.

Family nucleus

A nuclear family is composed by two or more household members who are related by blood, marriage or adoption. Family nucleus can be composed of:

- A couple
- A couple and unmarried child(ren)
- Single parent and unmarried child(ren)

Gender ratio

Number of males per hundred females.

Household

Individuals living together and make common provision for food or other essentials for living. Members of the household need not be related; an individual living alone is also considered as a household.

Household composition

It is derived from the information on family nucleus and the relationship among household members, comprising:

- One-person household
- Nuclear household
- No nuclear household

Household head

An individual aged 16 and above who is acknowledged by other member(s) as representative of the household.

Industry

Main economic activity engaged by an individual or enterprise during the reference period.

Labour force participation rate

The percentage share of economically active population (labour force) to the population aged 16 and above.

Literacy rate

The percentage share of the population aged 15 and above who can comprehend to read and write simple notes of everyday life.

Marital status

It refers to the status of an individual in respect of the law on marriage or customs of the country or territory.

To eliminate the impact caused by the difference in age-gender structure, respective data for 2001 have been re-compiled according to the standardized age-gender structure of the 2011 Population Census, which will enable direct comparison of the standardized data and the changes between two censuses.

Mobile population

Individuals who had stayed in Macao for at least one month but less than three months during the six months before the census reference moment or for at least one month but less than three months during the six months after the census reference moment.

Mortgage payment

The amount paid by owner-occupier or household to the bank, as repayment of the loan on mortgage of the residential unit.

Nationality

It refers to the status of being a national of a country.

Occupation

The set of tasks or duties an individual has undertaken during the reference period.

Overall dependency ratio

The percentage share of the youth and the elderly populations to the adult population aged 15-64.

Place of previous residence

It refers to the country or territory where an individual had lived for at least six months before making Macao as the place of usual residence.

Place of usual residence

It refers to the place where an individual usually lived during the reference period. If an individual stayed mostly in Macao during the six months before or after the census reference moment, his/her place of usual residence was Macao; otherwise, it would be of other country/territory.

Regular education

The provision of systematic curriculum organized principally for children and youngsters, from pre-primary education to university education.

Relationship to household head

It refers to the relationship of the household head and household members determined by blood relation, marriage, adoption, etc.

Rent

The amount paid by a household for leasing the residential unit occupied.

Residential unit

Building unit with the end-use intended for residential purposes.

Singulate mean age at marriage

It refers to the average number of years of single life of the individuals married before 50 years of age.

Status in employment

It refers to the status of the employed who had engaged in an economic activity during the reference period.

Classified as follows:

- Employer
- Self-employed
- Employee
- Unpaid family worker

Temporary unit

It refers to the unit in informal building being used for residential purposes, e.g. huts.

Tenure of residential unit

It refers to the arrangement or form of occupying a residential unit. Classified as follows:

- Owner-occupier
- Employer provided
- Tenant
- Others

Total duration of living in Macao

The number of complete years since an individual has established his/her usual residence in Macao, deducting the period(s) that an individual has left Macao continuously for six months or more.

Total population

It refers to the sum of usual population and mobile population.

Type of housing

Classification of type of housing comprises private housing, social housing and economic housing. Economic housing sold is classified as private housing.

Unemployed population

Individuals aged 16 and above who do not have a job or formal job attachment, are available to work for pay or to start own business, and have sought work during the last 30 days.

Usual language

The language an individual mostly used at home.

Usual population

Individuals who had stayed in Macao for at least three months during the six months before the census reference moment or for at least three months during the six months after the census reference moment.

Youth dependency ratio

The percentage share of the youth population (aged 14 and below) to the adult population (aged 15-64).

Symbols

-	Absolute value equals zero
..	Not applicable
0 [#]	Magnitude less than half of the unit employed
#	Confidential data
'000	Thousand
MOP	Macao Pataca
M	Male
F	Female
SAR	Special Administrative Region

Due to rounding, sum of the percentages may not correspond to the total.

TABLES

TOTAL POPULATION

1	Total population by gender, age group and parish	57
2	Population by gender and age group, in Santo António Parish, São Lázaro Parish and São Lourenço Parish	58
3	Population by gender and age group, in Sé Parish and Nossa Senhora de Fátima	59
4	Population by gender and age group, in the Islands	60

OTHER DEMOGRAPHIC CHARACTERISTICS

5	Population by gender, age group and place of birth	61
6	Population by gender, age group and nationality	62
7	Population by gender, age group and ethnicity	63
8	Population by gender, age group and educational attainment	64
9	Population by gender, age group and usual language	65
10	Population by gender, age group and language ability	66
11	Land-based school attending population by age group and educational attainment	67
12	Migratory flow of the land-based population by gender	68
13	Population by gender, age group and marital status	69
14	Population by gender, age group and the ability to read and write	70
15	Population attaining tertiary education by field of education and degree conferred	71
16	Population attaining degree course of tertiary education by gender and age group	72

ECONOMIC ACTIVITY STATUS

17	Economically active population and economically inactive population by gender and age group	73
18	Economically active population and economically inactive population by Marital status	74
19	Economically active population and economically inactive population by educational attainment	75
20	Employed population by gender, age group and status in employment	76
21	Employed population by age group and industry	77
22	Employed population by age group and occupation	78
23	Employed population by educational attainment and industry	79
24	Employed population by educational attainment and occupation	80

25	Employed population by industry and employment earnings in July 2011	81
26	Employed population by occupation and employment earnings in July 2011	82
27	Employed population by educational attainment and employment earnings in July 2011	83

NON-MACAO BORN POPULATION

28	Non-Macao born land-based population by gender, age group and total duration of living in Macao	84
29	Non-Macao born land-based population by gender, age group and year of moving to Macao	85
30	Non-Macao born land-based population by gender, age group and place of previous residence	86
31	Non-Macao born land-based population by total duration of living in Macao and place of previous residence	87
32	Non-Macao born population by age group and educational attainment	88

LOCAL POPULATION

33	Local population by gender, age group and place of birth	89
34	Local population by gender, age group and nationality	90
35	Local population by gender, age group and ethnicity	91
36	Local population by gender, age group and usual language	92
37	Local population by gender, age group and language ability	93
38	Non-Macao born land-based local population by gender, age group and total duration of living in Macao	94
39	Non-Macao born land-based local population by gender, age group and place of previous Residence	95
40	Local population by gender, age group and educational attainment	96
41	Local population attaining tertiary education by field of education and degree conferred	97
42	Local population by gender, age group and marital status	98
43	Local economically active population and economically inactive population by gender and age group	99
44	Median employment earnings in July 2011 of the local employed population by industry	100
45	Median employment earnings in July 2011 of the local employed population by Occupation	101

POPULATION WITH DISABILITY

46	Population with disability by gender and age group	102
----	--	-----

47	Population with disability by cause of difficulty	103
48	Population with disability by age group and cause of difficulty	104
49	Population with disability by age group and type of difficulty in daily activities	105
50	Population with disability by age group and duration of having difficulty	106

POPULATION BY STATISTICAL AREA

51	Demographic indicators by statistical area	107
52	Population by place of birth and statistical area	108
53	Population by nationality and statistical area	109
54	Non-Macao born population by total duration of living in Macao and statistical area	110
55	Population by educational attainment and statistical area	111
56	Population by marital status and statistical area	112
57	Economically active population and economically inactive population by statistical area	113
58	Employed population by status in employment and statistical area	114
59	Employed population by industry and statistical area	115
60	Employed population by occupation and statistical area	118

USUAL POPULATION

61	Usual population by gender, age group and parish	122
62	Usual population by gender, age group and place of birth	123
63	Usual population by gender, age group and nationality	124
64	Usual population by gender, age group and ethnicity	125
65	Usual population by gender, age group and educational attainment	126
66	Usual population by gender, age group and marital status	127
67	Usual local population by gender, age group and parish	128

HOUSEHOLD AND HOUSING

68	Total number of household by household size and statistical area	129
69	Land-based households by tenure of residential unit and statistical area	130
70	Land-based households by amount of rent or mortgage payment and statistical area	131
71	Land-based households by type of housing and statistical area	134
72	Land-based households by year of building completion and statistical area	135

73	Land-based population and households by storey of building and statistical area	136
74	Land-based households by household size and type of housing	137
75	Population and households by type of unit	138
76	Land-based households by possession of motor vehicles and statistical area	139
77	Land-based households by number of motor vehicles owned and statistical area	140
78	Land-based households by night-parking of motor vehicles and statistical area	141
79	Night-parking of household-owned private cars by statistical area	142
80	Night-parking of household-owned motorcycles by statistical area	143
